Portfolio: majid-ashraf · Jammu & Kashmir, India

Professional Summary

Frontend / Product Engineer with **3+ years of experience** building **AI-powered** and **workflow-heavy SaaS products**. Experienced in building scalable interfaces across **dashboard builders**, **chat systems**, **knowledge platforms**, document workflows, approval systems, and enterprise authentication. Strong focus on translating complex backend systems into intuitive product experiences using **React**, **Next.js**, **TypeScript**, and scalable frontend architecture. Passionate about building **AI products**, workflow systems, and product-driven software with strong ownership and execution.

Technical Skills

Core: React, Next.js, TypeScript, JavaScript, HTML5, CSS

State & Data: Redux, RTK Query, Axios, REST APIs, WebSockets, Server-Sent Events (SSE)

Visualization: Recharts, Bar Charts, Pie Charts, Treemaps, Clustered Charts

Architecture: Monorepo, Shared UI Libraries, Component Systems

UI Frameworks: ShadCN, Tailwind CSS, Material UI, NextUI, Angular Material, Bootstrap

Other: Angular, Node.js, Express, MongoDB

Tools: Git, Figma, Cursor, Claude Code

Professional Experience

Frontend Engineer

Mar 2022 – Present

Lelafe IT Solutions Pvt. Ltd.

- Engineered **data-intensive SaaS dashboards** used by business teams to monitor and act on **real-time intelligence** across multiple product lines.
- Improved rendering performance by approximately **20–30%** on data-heavy views handling **10k+ row datasets** using **memoization**, **virtualization**, and deferred rendering.
- Built **real-time interfaces** using **WebSockets** and **Server-Sent Events (SSE)** for live data streaming across chat and dashboard surfaces.
- Built conversational query interfaces including **Naxie** in Cognax.ai and **BISI** in Artixan for live enterprise data exploration.
- Built an **Automation Dock** to extract structured data from PDFs and files into normalized database tables for analytics workflows.
- Owned features **end-to-end** from UX design through **production deployment** across multiple concurrent product tracks.
- Maintained **shared UI libraries** across a frontend monorepo, improving consistency and reducing duplication.

Key Projects

Artixan – Data-Driven Enterprise Platform

- Architected a **frontend monorepo** spanning admin portal, user dashboard, and internal tooling with shared releases and a consistent design system.
- Built analytics dashboards using **Recharts** capable of rendering **10k+ row datasets** with optimized performance.
- Designed **shared UI systems** reducing duplication and maintenance overhead across products.
- Built **BISI**, a **real-time enterprise chat interface** using **WebSockets** and **SSE** for streaming responses connected to structured data pipelines.

Cognax.ai – Data Intelligence Platform

- Built **Dashboard Studio**, a **self-serve dashboard builder** using **React Grid Layout** for drag-and-drop positioning and dynamic widget resizing.
- Reduced chart rendering time by approximately **20–30%** through **memoization** and deferred rendering techniques.
- Built **Naxie**, a **streaming chat interface** using **WebSockets** and **SSE** for conversational data interaction.
- Collaborated with product and data teams to improve **analytics UX clarity** and usability for non-technical users.
- Designed and built an **Automation Dock** for PDF ingestion using **PDF.js** for viewing and structured data mapping workflows.

DeepDraft – Workflow Automation for RFPs

- Built **collaboration features** and streamlined **RFP workflows**, reducing operational overhead for enterprise teams.
- Implemented **automation workflows** and dynamic forms using **Next.js** and **RTK Query**.
- Built **markdown-based rendering** for rich structured editor output.

Saaf – Two-Sided Car Wash Marketplace

carwash-platform-mvp-05.vercel.app

- Founded and designed a **two-sided marketplace** connecting customers with on-demand and scheduled car wash services.
- Designed complete **UI/UX flows** for booking systems, vendor management, scheduling, slot management, and earnings tracking.
- Defined platform architecture including **geo-based vendor discovery**, slot reservations, and intelligent service recommendations.
- Developed **brand identity**, logo systems, and visual design language for market positioning.

Clearly.me – Thought-to-Action Clarity Engine

clearly-blond.vercel.app

- Founded and shipped a product that converts **unstructured thought** into **prioritized action plans**.
- Implemented **tone, intent, and emotional-context detection** for generating personalized clarity documents.
- Owned the **full product lifecycle** from UX research to deployment and iterative product improvements.

Education

Bachelor of Engineering in Computer Science
[Pacific University, Udaipur, India](#)

Aug 2017 – Aug 2021
