SUMMARY

Frontend Engineer with **4+ years** of experience building AI-powered SaaS products, real-time dashboards, workflow automation systems, and enterprise platforms. Experienced in React, Next.js, TypeScript, Node.js, LLM integrations, streaming interfaces, and end-to-end product ownership from design through deployment.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES2023+), HTML5, CSS3, Tailwind CSS, shadcn/ui, Material UI, Angular
Backend: Node.js, Express.js, REST APIs, WebSockets, Server-Sent Events (SSE), Authentication
Database: PostgreSQL, MongoDB
AI & LLM: OpenAI API, Anthropic Claude API, Multi-Agent Systems, Streaming Responses, LLM Integrations
State Management: Redux Toolkit, RTK Query, Axios
Visualization: Recharts, React Grid Layout
Architecture: Monorepos, Shared UI Libraries, Design Systems
Tools: Git, Figma, Cursor, Claude Code, Vercel

EXPERIENCE

Frontend Engineer

Mar 2022 – Present

Lelafe IT Solutions Pvt. Ltd.

Jammu & Kashmir, India (Remote)

- Engineered data-intensive SaaS dashboards across Cognax.ai and Artixan for enterprise business intelligence and analytics.
- Improved rendering performance by **20–30%** on views handling **10k+ row datasets** using memoization, virtualization, and deferred rendering.
- Built production-grade streaming chat interfaces (Naxie and BISI) using WebSockets and SSE integrated with enterprise data pipelines.
- Architected a frontend monorepo spanning admin portals, customer dashboards, and internal tools with shared UI libraries.
- Built an Automation Dock that extracted structured data from PDFs using PDF.js and transformed outputs into normalized database tables.
- Owned features end-to-end from UX design and prototyping through production deployment across multiple products.

PROJECTS

Clearly.me — AI Clarity Engine *Next.js, Groq Cloud, Streaming* github.com/MAJID-ASHRAF/AI-companinon-front-end

- Founded an AI product that converts unstructured thought into prioritized action plans using intent and emotional-context detection.
- Implemented real-time token streaming through Groq APIs for a highly responsive conversational experience.
- Owned the entire product lifecycle as part of the **100 Days of AI Engineering** challenge.

VectorShift Pipeline Editor *React Flow, FastAPI, Python*

- Technical assessment for VectorShift (YC S23) — delivered within 48 hours including a screen recording walkthrough.
- Built a React Flow-based DAG editor with a FastAPI backend.
- Implemented DAG validation, cycle detection, and node connectivity checks before pipeline execution.

Cognax.ai — Dashboard Studio *React, WebSockets, SSE, Recharts*

cognax.ai

- Built a self-serve dashboard builder using React Grid Layout with drag-and-drop widget management.
- Developed Naxie, a streaming AI chat interface for conversational interaction with enterprise datasets.
- Reduced chart rendering time by **20–30%** on large-scale dashboards via memoization and deferred rendering.

Saaf — Car Wash Marketplace *Next.js, React-Leaflet, OpenStreetMap*

github.com/MAJID-ASHRAF/carwash-platform

- Founded and developed a two-sided marketplace connecting customers with car wash service providers in Srinagar.
- Built geo-based vendor discovery, booking workflows, slot management, and earnings dashboards.

Artixan — Enterprise Platform *React, WebSockets, Recharts, Turborepo*

dev.app.artixan.ai

- Architected a Turborepo monorepo spanning multiple enterprise applications with shared packages and design systems.
- Built BISI, a real-time AI chat interface connected to structured business data pipelines.

EDUCATION

Bachelor of Engineering in Computer Science

Pacific University

Aug 2017 – Aug 2021

Udaipur, India
